

# STORMWATER

Tip of the Week

Week 28: July 13, 2021

## STORMWATER CROSSWORD PUZZLE

### ACROSS

2. A type of pollution that occurs when rainfall, snowmelt, or irrigation runs over land or through the ground, picks up pollutants, and deposits them into rivers, lakes, and coastal waters or introduces them into ground water.

3. An opening leading to an underground pipe or open ditch for carrying surface runoff, separate from the sanitary sewer or wastewater system.

8. Water that runs off surfaces such as rooftops, paved streets, highways, and parking lots. It can also come from hard grassy surfaces like lawns, play fields, and from graveled roads and parking lots.

9. A pipe or concrete box structure which drains open channels, swales, or ditches under a roadway or embankment typically with no catch basins or man-holes along its length.

### DOWN

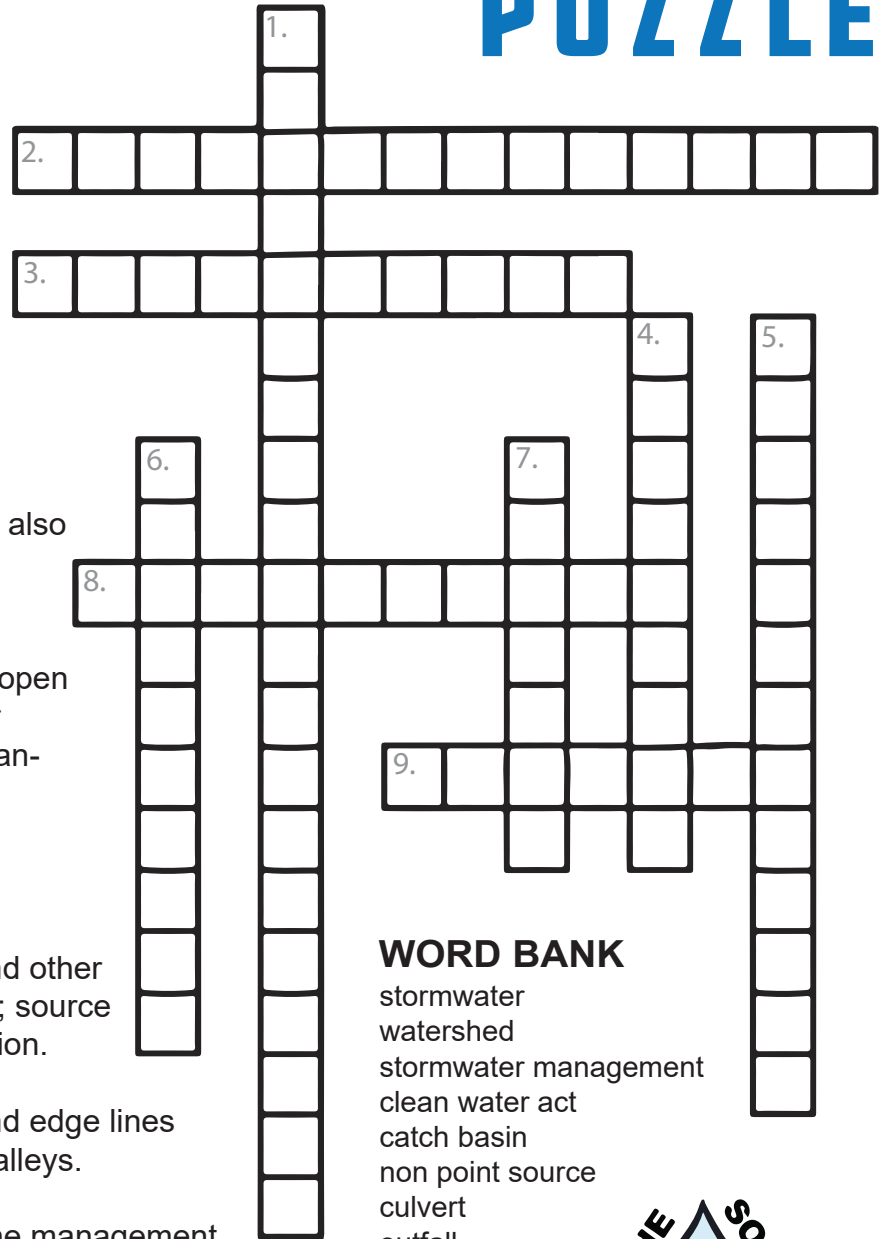

1. The application of site design principles and construction techniques to prevent sediments and other pollutants from entering surface or ground water; source controls; and treatment of runoff to reduce pollution.

4. A basin-like landform defined by highpoints and edge lines that descend into lower elevations and stream valleys.

5. The federal environmental law that includes the management of stormwater.

6. A cistern located at the point where a street gutter discharges into a sewer and designed to catch and retain matter that would not pass readily through the drainage system.

7. The place where a river, storm drain, or sewer empties into the sea, a river, or a lake.
